

You're Invited

TO REVIEW THE PROPOSED TRANSMISSION LINE ROUTE

Idaho Power will host public open houses to present information and gather input on the new 500 kilovolt transmission line it proposes to build between northeast Oregon and southwest Idaho.

DATES AND
LOCATIONS**

Your input is important.

The need for more energy continues to grow. The Boardman to Hemingway Transmission Line Project will improve the delivery of electricity to Idaho Power's customers and enhance system reliability throughout the Northwest.

For the past year, Idaho Power has worked intensively with your community to develop a route for the Boardman to Hemingway Transmission Line Project. We invite you to attend a public open house and give us your comments on the proposed route.

The public open house will give you the opportunity to:

- Learn more about the project
- See the proposed route in detail
- Ask questions
- Get important information about the upcoming federal and state review processes

We encourage you to visit www.boardmantohemingway.com to learn more information about the project and view maps of the proposed route.

Boardman to Hemingway Transmission Line Project
